AUTHOR INDEX

Volume 68 (1988)

Abbott, H.L. and M. Katchalski, Snakes and pseudo-snakes in powers of complete graphs (1) 1–8
Bhat-Nayak, V.N. and V.D. Kane, Two families of simple and irreducible BIBDs (Note) (2,3) 311–313
Brown, R.B., Nonexistence of a regular graph design with $v = 17$ and $k = 6$ (Note) (2,3) 315–318
Carlson, T.J., Some unifying principles in Ramsey theory (2,3) 117–169
Chen, Z.-B. and F.-J. Zhang, Bounds of the longest directed cycle length for minimal strong digraphs (1) 9–13
Delandtsheer, A., Line-primitive groups of small rank (Communication) (1) 103–106
De Werra, D., see A. Hertz (1) 111–113
Ding, R., K. Kołodziejczyk and J. Reay, A new pick-type theorem on the hexagonal lattice (2,3) 171–177
Egawa, Y., H. Enomoto and A. Saito, Factors and induced subgraphs (2,3) 179–189
Emamy-K., M.R., On the covering cuts of c^d ($d \leq 5$) (2,3) 191–196
Enomoto, H., see Y. Egawa (2,3) 179–189
Farmakis, N., see S. Kounias (1) 59–69
Feix, R., On a property of graphs containing infinitely many isomorphic copies of themselves (2,3) 197–209
Gionfriddo, M. and S. Milici, On the parameter $v_2(h)$ for L_2-coloured graphs (Note) (1) 107–110
Greene, J., Bijections related to statistics on words (1) 15–29
Greenwell, R.N., see B.M. Landman (1) 77–83
Griggs, J.R., C.M. Grinstead and D.R. Guichard, The number of maximal independent sets in a connected graph (2,3) 211–220
Grinstead, C.M., see J.R. Griggs (2,3) 211–220
Gudder, S.P. and G.T. Rüttimann, Finite function spaces and measures on hypergraphs (2,3) 221–244
Gudder, S.P. and G.T. Rüttimann, Positive sets in finite linear function spaces (2,3) 245–255
Guichard, D.R., see J.R. Griggs (2,3) 211–220
Hertz, A. and D. de Werra, Perfectly orderable graphs are quasi-parity graphs: a short proof (Note) (1) 111–113
Hooker, J.N., Networklike metric spaces (1) 31–43
Kane, V.D., see V.N. Bhat-Nayak (2,3) 311–313
Katchalski, M., see H.L. Abbott (1) 1–8
Kołodziejczyk, K., see R. Ding (2,3) 171–177
Koukouvinos, C. and S. Kounias, Hadamard matrices of the Williamson type of order $4 \cdot m$, $m = p \cdot q$ an exhaustive search for $m = 33$ (1) 45–57
Kounias, S. and N. Farmakis, On the excess of Hadamard matrices (1) 59–69
Kounias, S., see C. Koukouvinos (1) 45–57
Kreweras, G. and P. Moszkowski, Signatures des permutations et des mots extraits (1) 71–76
Landman, B.M. and R.N. Greenwell, Values and bounds for Ramsey numbers associated with polynomial iteration (1) 77–83
Lemos, M., An extension of Lindström's result about characteristic sets of matroids (1) 85–101
Locke, S.C., Extremal 3-connected graphs (2,3) 257–263

McCanna, J.E., Orientations of the n-cube with minimum diameter (Communication) (2,3) 309–310
Miklós, D., M.J. Newman, Á. Seress and D.B. West, The addition game: an abstraction of a communication problem (2,3) 265–272
Milici, S., see M. Gionfriddo (1) 107–110
Moszkowski, P., see G. Kreweras (1) 71–76
Newman, M.J., see D. Miklós (2,3) 265–272
Piotrowski, W., Chordal characterization of graphic matroids (2,3) 273–279
Reay, J., see R. Ding (2,3) 171–177
Rüttimann, G.T., see S.P. Gudder (2,3) 221–244
Rüttimann, G.T., see S.P. Gudder (2,3) 245–255
Sagan, B.E., Inductive and injective proofs of log concavity results (2,3) 281–292
Saito, A., see Y. Egawa (2,3) 179–189
Seifert, B.G., On the arithmetic of cycles for the Collatz–Hasse ('Syracuse') conjectures (2,3) 293–298
Seress, A., see D. Miklós (2,3) 265–272
Sheehan, J., Graph decomposition with constraints on the minimum degree (2,3) 299–307
West, D.B., see D. Miklós (2,3) 265–272
Zhang, F.-J., see Z.-B. Chen (1) 9–13
